

WIP Workgroup 2012 Work Plan

Activity: Support Development of the State's growth offset policy

Description: Participate in the public review/stakeholder feedback process for the State's growth offset policy, including review and comment on mechanisms to implement the policy. Pending input and discussion with the State, the role of the WIP Workgroup could include regular meetings with the State's growth offset workgroup to support the State's interest in obtaining stakeholder input on the policy under development now and due for public release later in 2012. At the end of 2012, the WIP Workgroup will provide a report to the MSGC regarding its review of the State's growth offset policy and implementing mechanisms. Depending on the review, the MSGC could make a decision whether to endorse the State's approach.

Intended Accomplishment:

- 1) During 2012, regular review and comment on the State's growth offset policy and mechanisms to implement the policy.
- 2) By December 2012, a report to the MSGC on the State's growth offset policy and mechanisms to implement the policy, potentially including a recommendation to endorse the State's approach.
